DISCLAIMER AND FORWARD-LOOKING STATEMENTS

FORWARD STATEMENTS INCLUDE

This presentation has been prepared for Homerun Resources Corporation (HMR).

This document contains background information about the resource projects which are current at the date of this presentation. The presentation is in summary form and does not purport to be all inclusive or complete. Recipients should conduct their own investigations and perform their own analysis to satisfy themselves as to the accuracy and completeness of the information, statements and opinions contained in this presentation.

This presentation is for information purposes only. Neither this presentation nor the information contained in it constitutes an offer, invitation, solicitation, or recommendation in relation to the purchase or sales of shares in any jurisdiction.

This presentation does not constitute investment advice and has been prepared without taking into account the recipient's investment objectives, financial circumstances or particular needs and the opinions and recommendations in this presentation are not intended to represent recommendations of particular investments to particular persons. Recipients should seek professional advice when deciding if an investment is appropriate. All securities involve risks which include (among others) the risk of adverse or unanticipated market, financial or political developments.

To the fullest extent permitted by law, HMR, its officers, employees, agents and advisors do not make any representation or warranty, express or implied, as to the currency, accuracy, reliability or completeness of any information, statements, opinions, estimates, forecasts or other representations contained in this presentation. No responsibility for any errors or omissions from this presentation arising out of negligence or otherwise is accepted.

This presentation may include forward-looking statements. Forward-looking statements are only predictions and are subject to risks, uncertainties and assumptions which are outside the control of HMR. Actual values, results or events may be materially different to those expressed or implied in this presentation. Given these uncertainties, recipients are cautioned not to place reliance on forward looking statements. Any forward-looking statements in this presentation speak only at the date of issue of this presentation.

Subject to any continuing obligations under applicable law, HMR has not undertaken any obligation to update or revise any information or any of the forward-looking statements in this presentation or any changes in events, conditions, or circumstances on which any such forward looking statement is based.

OUR VISION & MISSION

VISION

Our vision is to be a leading materials company in the high-purity (HPQ) silica energy and industrial verticals.

MISSION

Our mission is to provide our customers with the highest quality materials, using sustainable and responsible practices, and to continuously improve our offerings through innovation based on customer feedback, while fostering a culture of safety, teamwork, and social and environmental respect.

BUSINESS PLAN ROADMAP

Phase 1 – HPQ Silica Supply

Homerun has announced multiple agreements to secure a substantial supply of Silica from the Belmonte District in Bahia, Brazil, including our partnership with the Bahian State Government. This exceptionally high-grade raw resource can be efficiently processed to serve the premium end-markets for HPQ Silica. The strategic imperative under Phase 1, was to secure a steady and reliable source of HPQ Silica against a backdrop of increasing global demand in sustainable industrial and green energy applications. The Company will continue in its ongoing plans to control the Belmonte Silica Sand District as well as look for other resources of high-grade silica, globally.

Phase 3 – Vertical Integration

Homerun is driving toward revenue and at the same time, under Phase 3, executing on engineering and R&D plans to secure competitive advantages in HPQ Silica verticals serving the Energy Transition. Announcements in this area have already been made (NREL) and will be forthcoming over the entirety of 2024 with deliverables expected in 2025 and beyond.

2023

2024

2025

May 2024 – Homerun Executes LOI With SI&MEX For Up To 365,000 Tonnes Of Solar Glass Per Year

Phase 2 – Infrastructure and Revenue

The Silica Sand from the Belmonte District can be sold in its natural form to a select few organizations that have their own upgrade processing operations, but this is a very low margin opportunity. The supply into higher-value end-uses requires at least a minimal amount of processing (wash, size, dry and bag).

Under Phase 2, the focus is on obtaining the required infrastructure through partnership, purchase, lease and capital expenditure for the mining, transportation, storage and processing to HPQ Silica. ***Announcements in this area will be forthcoming over the first half of 2024 to facilitate first HPQ Silica revenues in the second half of 2024.***

Homerun Resources

OUR GOALS

- We will be a top supplier of HPQ Silica and manufactured HPQ Silica products into the Energy Transition.
- We will create jobs for and support the local people of Brazil, while respecting the environment and culture of Brazil.

HOMERUN RESOURCE PARTNERS

At the National Renewable Energy Laboratory (NREL), we focus on creative answers to today's energy challenges. From breakthroughs in fundamental science to new clean technologies to integrated energy systems that power our lives, NREL researchers are transforming the way the nation and the world use energy

Babcock & Wilcox is a leader and innovator in the energy transition, making net-zero ambitions a reality today for a cleaner tomorrow. With our proven clean-energy solutions, we continue to meet the challenges of the ever-changing energy landscape. We have aligned our strategy, culture and day-to-day operations to support these worldwide initiatives.

Companhia Baiana de Pesquisa Mineral (CBPM) is the mineral research and development company of the State of Bahia, Brazil. Its activities are centered on expanding and improving geological knowledge of the Bahian territory, by identifying and researching its mineral resources and promoting their use by attracting private initiatives to this end. Founded on December 18, 1972, CBPM is recognized as one of the most dynamic companies in mineral research in Brazil.

UC-Davis Material Science and Engineering UC-Davis will be conducting innovative mechanical and thermal efforts to provide insights into purifying Homerun's natural Brazilian silica sand toward the commercial goal of upgrading the raw silica to silicon, a material of immense application in the energy and electronic technologies sectors.

Minerals Development Oman (MDO) was established with a clear strategic vision to unleash the potential of the mining sector by investing directly in or enabling various projects across a range of material commodities and value chains, to generate sustainable returns for its shareholders, Oman and its people.

Halocell Energy is a pioneering company at the forefront of perovskite solar cell technology. Founded with a vision to revolutionize renewable energy, Halocell specializes in the development and commercialization of high-efficiency perovskite solar cells for a sustainable future. With a team of leading experts and innovators in the field, Halocell is dedicated to advancing the performance, stability, and scalability of perovskite solar cells to make them a viable and competitive alternative to traditional silicon-based photovoltaics.

Si&MEx Solutions is a technology, engineering and ESG based company with decades of experience in Silicon and Photovoltaics Field. With international footprint, the company is stepping into Manufacturing with high circularity the lowest CO2-equivalente footprint and high automation and digitalization applied to the Photovoltaics Silicon Manufacturing.

MANAGEMENT

BRIAN LEENERS – CEO/DIRECTOR

Brian Leeners received both his B.Comm. and LL.B. degrees from the University of British Columbia in 1992 and since that time has been focused on the management of private and public venture companies. In 2002, he founded Nexvu Capital Corp. which is a venture capital firm focused on developing companies in the Materials and Technology Sectors. Nexvu provides hands-on business development strategy and expertise for start-up and growth phase companies. Focused on both private and public companies, Nexvu also insulates the operational management from the public company process and provides economies of scale in the regulatory/legal, accounting/audit and investor relations areas. Since formation in 2002, Nexvu has been directly responsible for raising in excess of US$100 million for Nexvu transactions (not including any public market buy-side volumes).

ANTONIO VITOR – COUNTRY MANAGER BRAZIL

Antionio has vast experience in project management at large corporations, including Transpetro, PwC, Shell, along with 10 years of experience in mining. He was involved in the mining projects Zumbi Mineração Grafite de veio, AMA Gold, Hawking Graphite, 3 S Rare Earths and Copper, Palmeres Rare Earths. He graduated in Business Administration and holds an MBA. He is a Member of IBGC.

DR. MAURO CESAR TERENCE - CTO

Dr. Mauro Cesar Terence - Graduation in Chemistry from Universidade Presbiteriana Mackenzie (1994), Masters in Nuclear Engineering from Universidade de São Paulo (1996), Doctorate in Nuclear Engineering from Universidade de São Paulo (2002). Experienced in Material and Metallurgical Engineering, in the following subjects: Advanced Materials, Nano Materials, Biomaterials, Ceramics, Blends and Polymers.

ARMANDO FARHATE – CHIEF OPERATING OFFICER

Armando Farhate, a Brazilian citizen, has more than 36 years of industry experience, with the last 13 years being in the mining sector. He has occupied C-Level and Upper Management positions in mining companies in Brazil, Canada, Namibia and Botswana and is currently a Director on the Board for three Canadian mining and exploration companies. He brings extensive experience in all areas of this industry segment, with special focus on Operations, Sales & Marketing, Engineering and Mineral Resource Development.

NANCY ZHAO - CFO

Ms. Zhao has over 9 years of experience working with public companies, having served as the CFO for several publicly traded entities, contributing her financial acumen to organizations such as First Hydrogen Corp (TSXV-FHYD), and Neo Battery Materials Ltd (TSXV-NBM). Ms. Zhao is currently a board member of First Hydrogen Corp. Holding the designation of CPA, Ms. Zhao has a comprehensive educational background, including a diploma in Financial Management from British Columbia Institute of Technology, and a bachelor’s degree in chemical engineering from Tianjin University of Technology. Ms. Zhao's professional journey encompasses diverse roles, including years of valuable experience as a procurement agent for Sinopec in China.

BUSINESS PLAN
PHASE 1

HPQ SILICA
SUPPLY

PHASE 1 – HPQ SILICA SUPPLY

GOAL: 100 Million Tonnes of *Owned* and *Permitted* Raw Silica Sand Resources by End of 2024

CONTRACTED RESOURCES	RESOURCE PERMIT STATUS	RAW Si02 GRADE	PROCESSED Si02 GRADE
CBPM Lease (MRE in Process)	Goal 100 MM Tonnes - MRE to Permit	TBD – In Process	99.999% Si02 UC Davis Femtosecond Laser
Guidoni (CBPM Lease)	TBD – LOI Stage to Definitive Agmt	99.74% Si02	
SDP (Material Supply Agreement)	+80 MM Tonnes – Permitted - MRE	99.88% Si02	+99.95% Si02 – Wash and Sized
Tatooine (British Columbia Quartz)	NI 43-101 Technical Report	98.8% Si02 - 27 Samples Avg	TBD – UC Davis Laser
NEGOTIATION RESOURCES			
Vendor 1 (CBPM Lease)	40 MM Tonnes - In Permit Process		
Vendor 2 (CBPM Lease)	100 MM Tonnes - Permit		
EXPLORATION RESOURCES			
Exploration Concessions	7930 ha – 100% OWNED		

In Collaboration with UC Davis, Homerun has developed a femtosecond thermal laser processing method to purify raw and at surface silica sand to a level of 99.999% purity

PHASE 1 - VERIFIED HPQ QUALITY

ACHIEVED: Homerun Produces Ultra-Pure 99.999% Si02 from RAW Sand

Extremely low Iron (Fe) Content Suitable For Energy and Technology Applications

	Al [ppm]	Fe [ppm]	Na [ppm]	K [ppm]	Li [ppm]	Ti [ppm]	Zr [ppm]	Ca [ppm]	Mg [ppm]	Cr [ppm]	Mn [ppm]	Cu [ppm]	Sum [ppm]

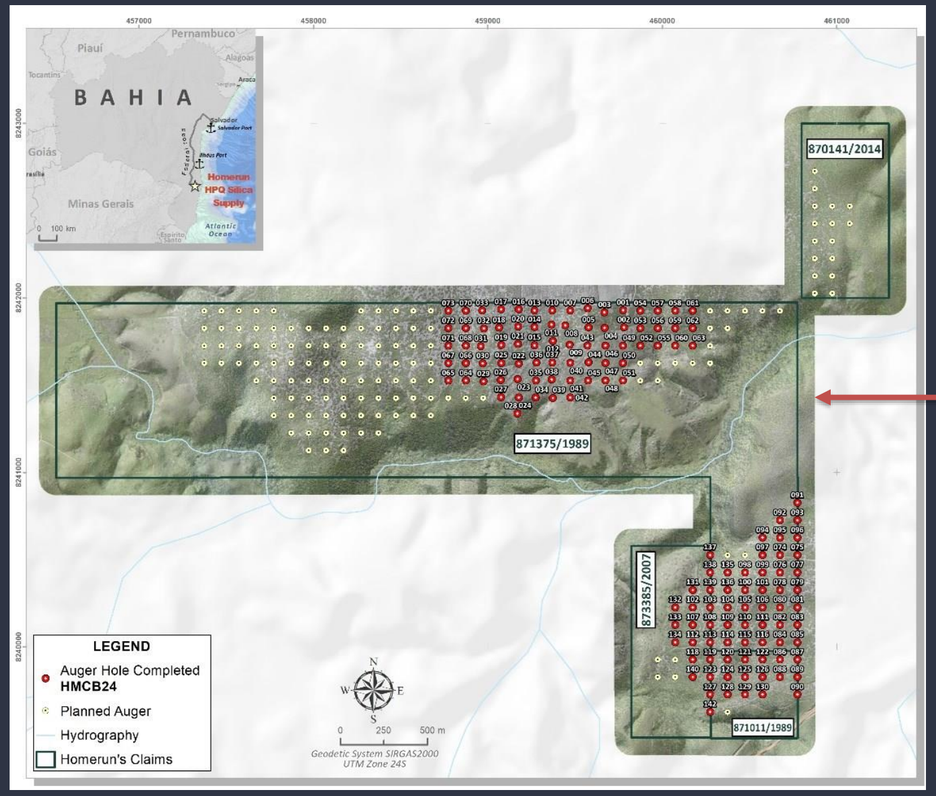
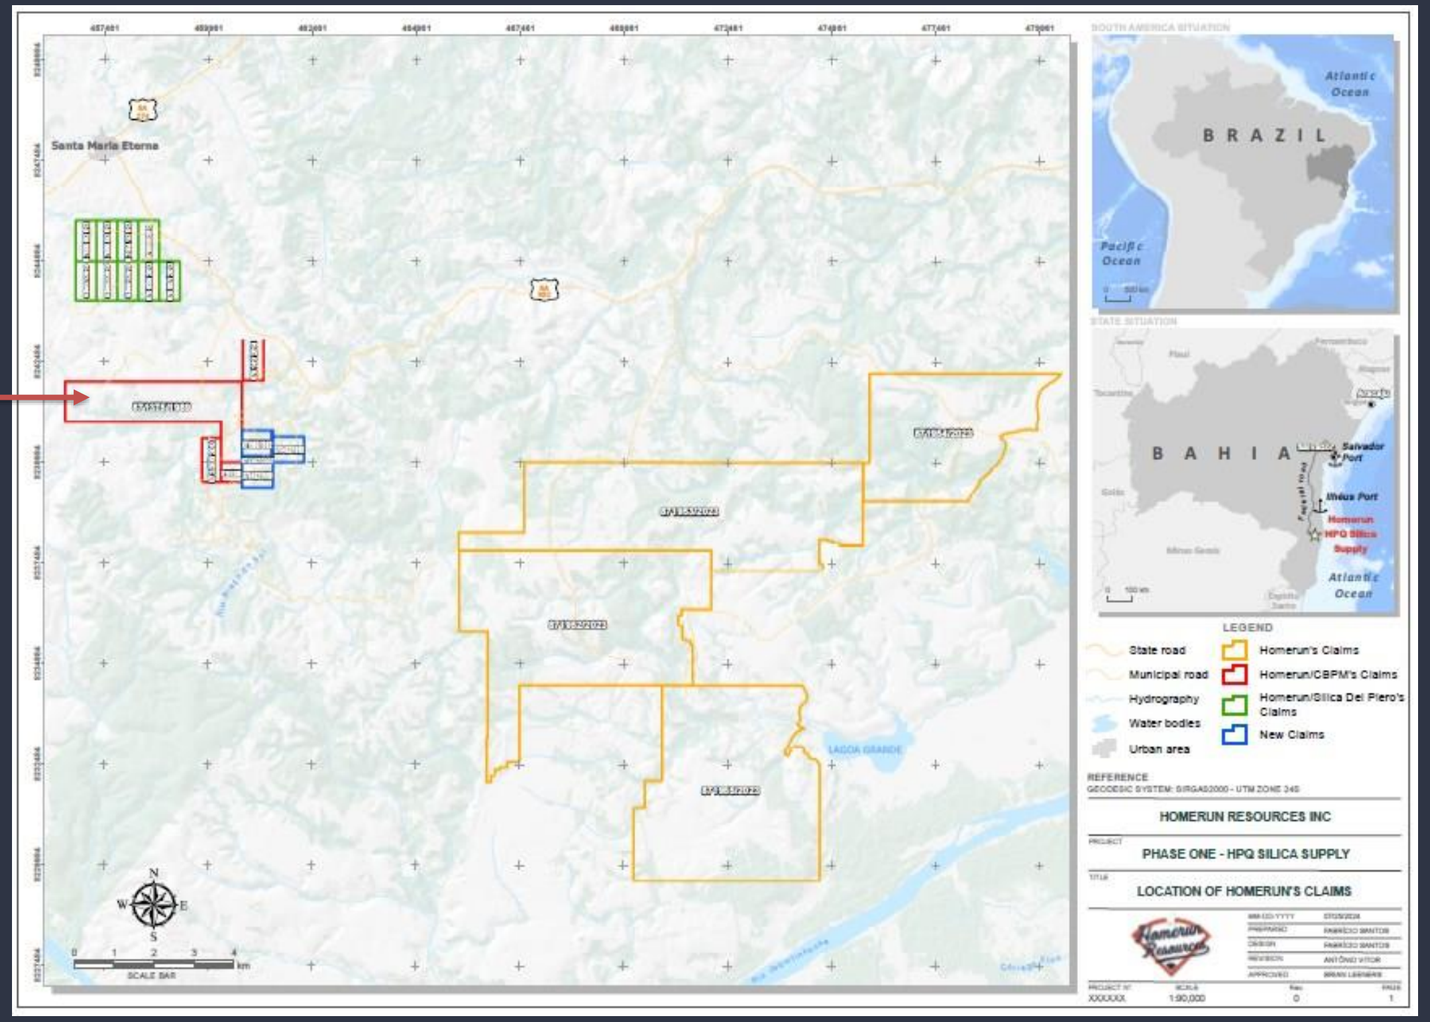
Optical glass Type II		<5								<0.1	<0.1	<0.1	

*** This slide illustrates 3rd party testing and verification of extremely low impurities of sand in RAW form - By just washing and sizing the sand (highlighted yellow), most impurities are eliminated resulting in a grade of +99.95% Si02**

PHASE 1 - MAIDEN RESOURCE IN PROCESS



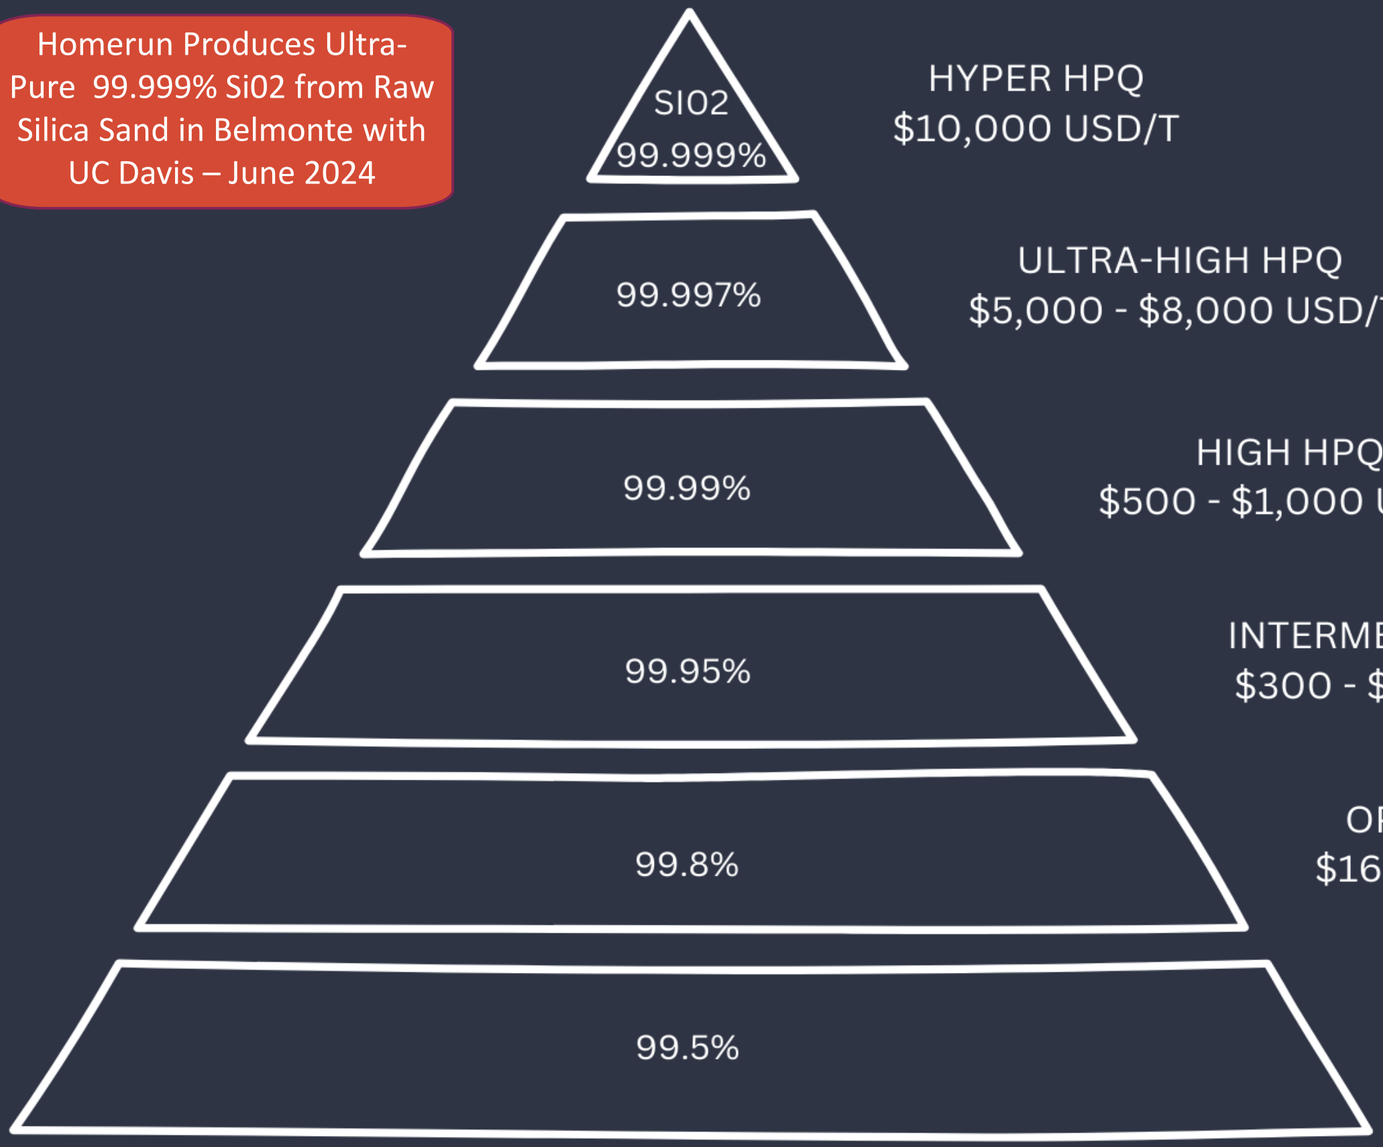


Findings to date reveal ultra pure silica sand from surface to depths greater than current auger drill program reaches, further illustrating the homogenous nature of the Belmonte Silica sand District. Further results anticipated in due time.

GOAL: 100 Million Tonnes of *Owned* and *Permitted*

AVERAGE USD PRICES FOR HPQ SILICA GRADES

Homerun Produces Ultra-Pure 99.999% Si02 from Raw Silica Sand in Belmonte with UC Davis – June 2024



- Belmonte Silica District (In Ground) Material Grades AVG ***~99.75% Si02***
- Standard Physical Processing Achieves Grade +99.985% Si02
- BREAKING: Homerun Achieves Ultra-Pure ***99.999% Si02*** with femtosecond thermal laser processing method at UC Davis
- Pyramid is representation of market size per use case.

HOMERUN IS FOCUSED ON DISRUPTION…. HERE'S WHY

SIBELCO

Sibelco - $2.6 Billion Euro Market Cap
A dominant player in HPQ Space

Sibelco Process	Spruce Pines – North Carolina
1.	Blasting
2.	Crushing
3.	Grinding
4.	Flotation / Separation
5.	Ship to Thermal Plant
6.	Calcination / Acid Leaching
Final Product	**+99.99% Si02 – Top of Pyramid**

VS.

Homerun Resources

Homerun Resources - $100M Cad Market Cap
A disruptive player in HPQ Space

Homerun Process	Belmonte – Bahia, Brazil
1.	Extraction
2.	Wash and Sort
3.	Femtosecond Laser
Final Product	**+99.99% Si02 – Top of Pyramid**

Note: These testing results have not yet been independently verified and will be the subject of a Homerun Patent Application currently in process.

KEY TAKEAWAYS

- No Blasting, Crushing or Grinding
- No Hazardous Chemicals
- If Femtosecond laser powered by Green Energy - 100% Clean and Green
- Femtosecond thermal laser processing method at UC Davis being tested on quartz HPQ from Homerun's Tatooine Asset in British Colombia.
- Homerun has SECOND disruptive process underway with NREL for clean upgrading of HPQ silica sand

Source: https://youtu.be/MZf3ksYsHz8?si=jlIL18MHWB1DaHW1

COMPETITIVE LANDSCAPE AT THE TOP OF THE PYRAMID

Homerun Resources

BUSINESS PLAN PHASE 2

INFRASTRUCTURE & REVENUE

PHASE 2 – INFRASTRUCTURE & REVENUE

GOAL: Production of Processed Silica to Revenues

LOGISTICS & PROCESSING TO FIRST REVENUES

Silica Extraction	- Contract Service Provider
Silica Transport	- Contract Service Providers
Silica Processing	- Wash, Sort, Bag

THERMAL PROCESSING TO +99.99

Traditional	- Calcination + Acid Leach
Thermoelectric	- One-Step Laser
Hybrid	- NREL Enduring System

PHASE 2 – INFRASTRUCTURE & REVENUE

GOAL: Logistics for the sale of Processed Silica in Q4 2024 / Q1 2025

PORT OF ILHEUS

- Truck Transport of Silica to the Port of Ilheus
- Storage Facility
- Loading Facility
- Shipping Facility
- Energy Infrastructure
- Recent Significant Government Funded Port Upgrades

PORT OF ILHEUS HAS IMMEDIATE SHIPPING CAPACITY

PHASE 2 – INFRASTRUCTURE & REVENUE

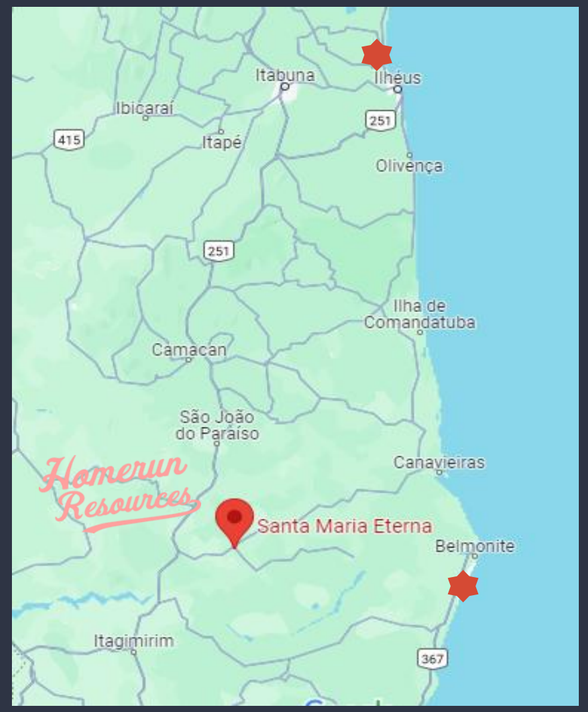
GOAL: Advanced Processing of Silica for Energy Transition Verticals

PORT OF ARATU / CAMACARI

- Storage Facility
- Loading Facility
- Shipping Facility
- Energy Infrastructure
- Advanced/Thermal Processing Will Take Place in Camacari
- Multiple Industrial Organizations are based at the Port of Aratu / Camacari

PHASE 2 – INFRASTRUCTURE & REVENUE

GOAL: Logistics for scaling the sale of processed silica



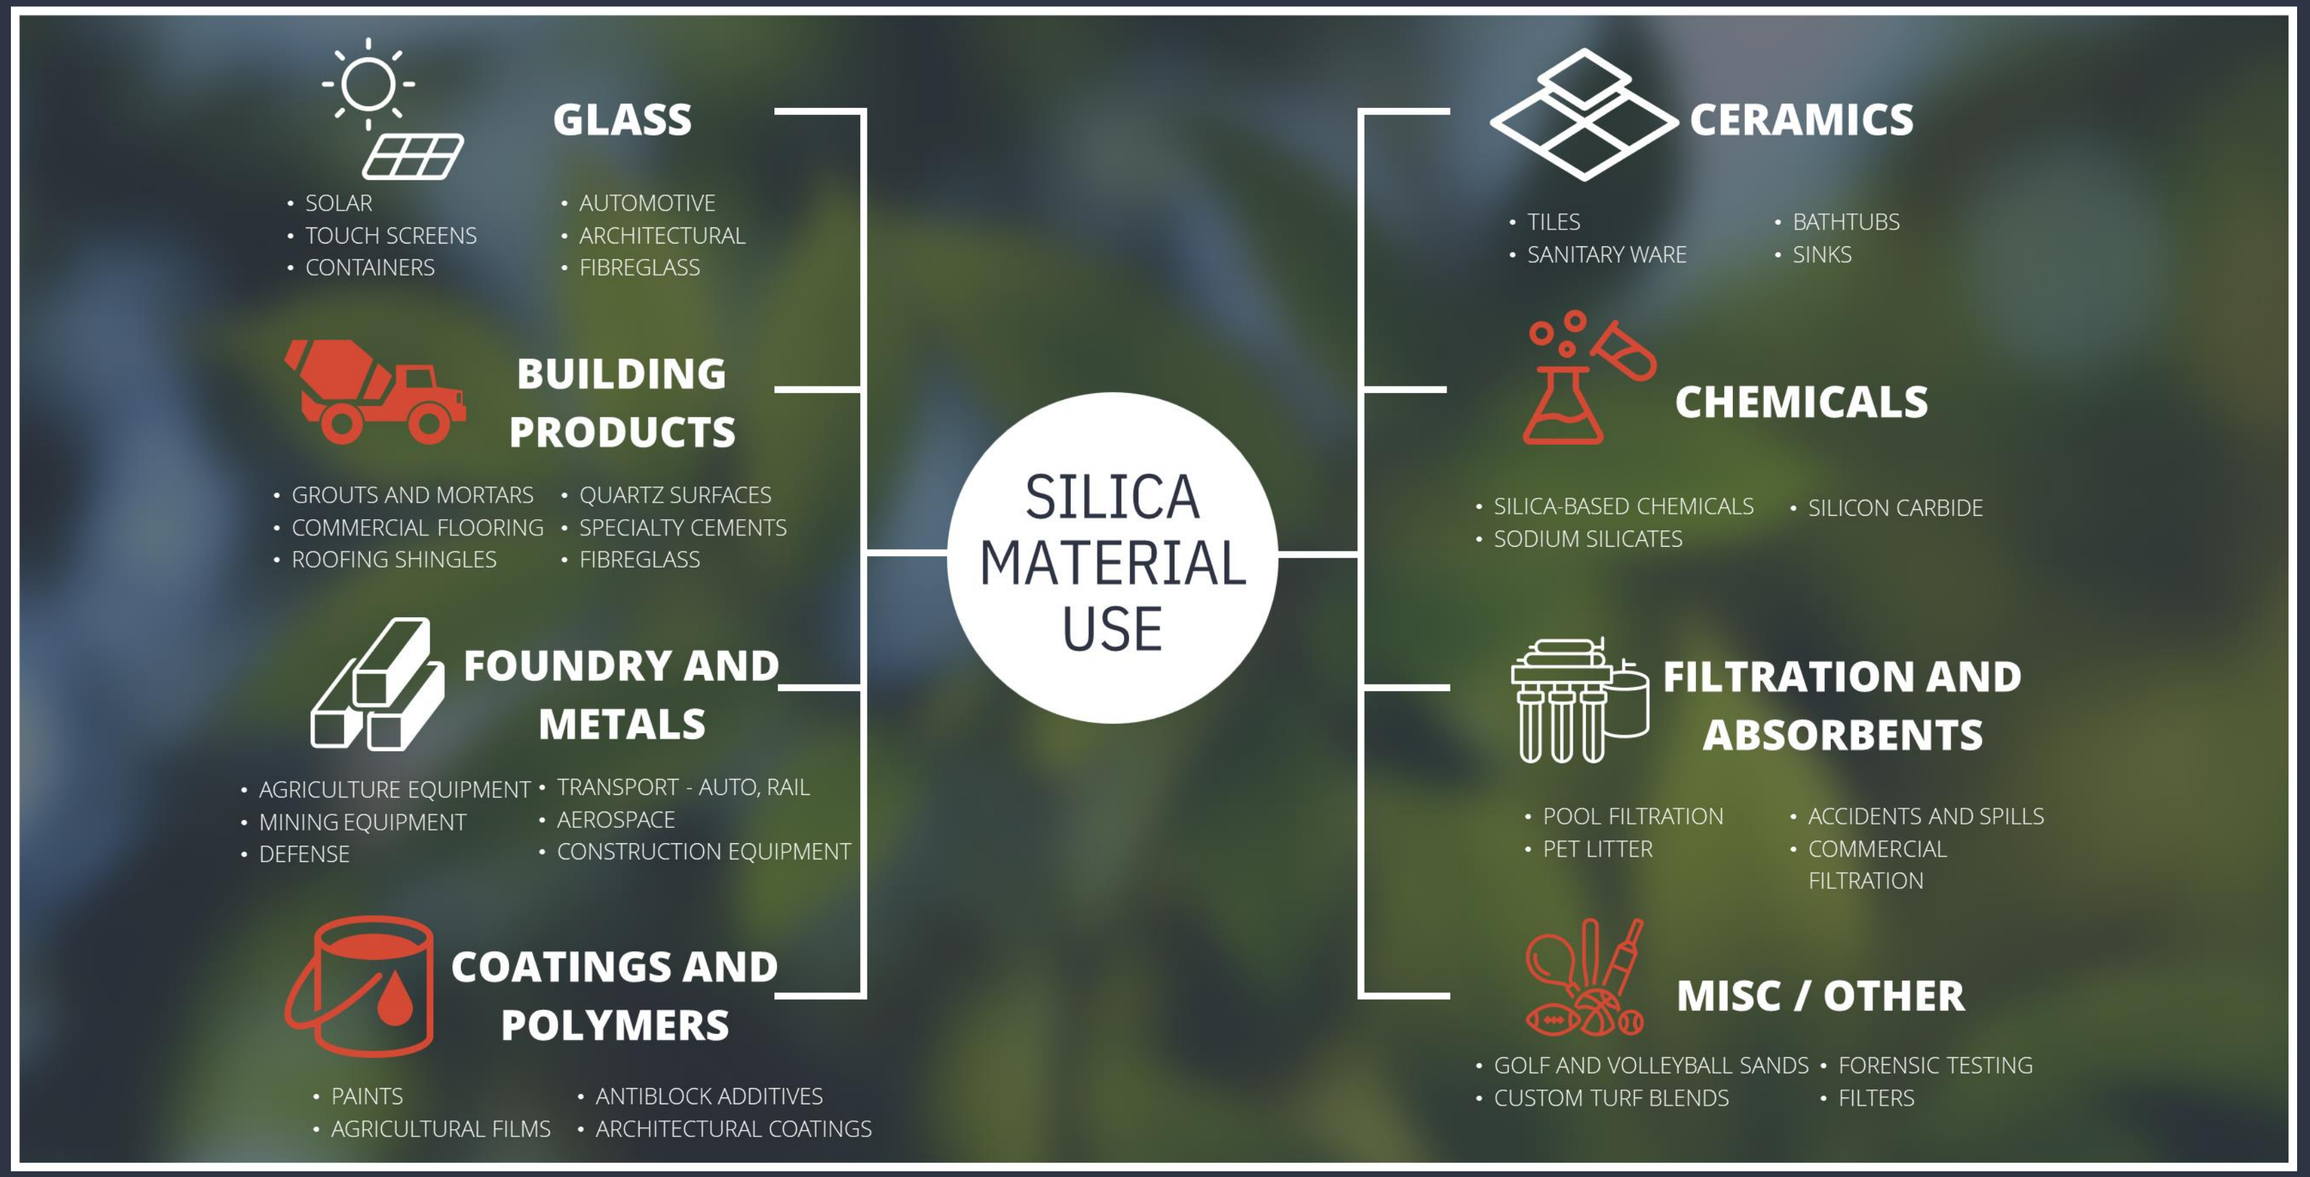
- Medium term plan is to move the extracted silica sand from Santa Maria Eterna (the mine) to tide water through Belmonte.
- From Belmonte the silica sand will be transported by large ocean barge to storage at the port of Ilheus and for advanced processing at the port of Aratu in Salvador.
- Significant operating cost reductions.

BELMONTE DISTRICT

- Mine Infrastructure
- Road Infrastructure
- Power Infrastructure
- Energy Infrastructure
- Barge Loading Facility
- Single Barge capacity of 10,000t
- Multi Barge capabilities

The mine requires extraction, first phase processing, loading facilities and double haul trucks.

HPQ SILICA MARKETS



HPQ SILICA MARKETS

“Our entire society is built on sand. Sand is the primary substance used in the construction of roads, bridges, highspeed trains and even land regeneration projects. Sand, gravel and rock crushed together are melted down to make the glass used in every window, computer screen and smart phone. Even the production of silicon chips uses sand.”

“Yet, the world is facing a shortage...“
CNBC - 2021

U.S. DEPARTMENT OF ENERGY

PROCESSING & PRODUCT DEVELOPMENT (UC-DAVIS)

SILICA TO SILICON
- Metallurgy / Processing to HPQ for Quartz Crucible, PV Silicon and Battery Anode

SILICON & GRAPHITE
- Carbide-based refractories and oxycarbide glasses, creating combined material solutions utilizing high-purity silica and graphite.

PEROVSKITE PV (Halocell Energy)

PEROVSKITE SOLAR CELLS (PSC)
- Collaborate to develop and produce the highest efficiency and most stable outdoor Solar Glass / PSC solutions.
- Maximize life span of solar cells
- Maximize overall performance of solar cells
- Provide best performance cells at lowest cost
- Incorporate PSC into solar glass production as final device

PHASE 3 – VERTICAL INTEGRATION

HOMERUN SIGNS LOI WITH SI&MEX FOR UP TO 365,000 TONNES OF SOLAR GLASS PER YEAR

- The primary focus of the partnership between Homerun and Si&Mex is for Homerun to provide Si&Mex with up to 365.000 tonnes per year of solar glass supply, under agreed specifications and commercial terms.
- The Parties will jointly develop plans for a High Purity Solar Crucible Manufacturing plant for Ingot and Wafer manufacturing in the Silica to Solar Supply Chain.
- Si&Mex plans to produce up to 5GW in annual production (circa 10 to 12 million Solar Modules including bi-facial glass-on-glass) in Camacari, Bahia, Brazil starting in 2024.
- With 113,147 MW of solar capacity in the pre-construction phase, Brazil ranks second to China (241,744 MW) in solar pre-construction globally

2024 - Technical Collaboration and the Commercial Supply of Glass from Homerun to the Si&Mex Solar Manufacturing facility in Camacari, Bahia, Brazil.

PHASE 3 – VERTICAL INTEGRATION
